Fishermen: Start Your Engines

Spring is here, prices are up and Bristol Bay sockeye salmon are on their way home from the North Pacific. Also, the importance of kings, chums, cohos, and pinks to our fishery should not be ignored.

Boneless, vacuum-packed, filleted, once-frozen salmon from Bristol Bay is becoming embedded in the U.S. market place. This product, without a doubt, is a wonderful product from the Bay, a perfect match for the fishery and the market.

AIFMA's efforts, along with processors, starting back in 1994, to bring this product to the heart of the U.S. were insightful. Marketing Bristol Bay sockeye in the U.S. turned out to be a big part of the economic recovery for the fleet and the local region.

A lot of due diligence over time has put us back on our feet. The new fillet products, along with new companies operating in the Bay, have put an economic tripod under the fishery. Continued efforts to perfect fishing and handling practices, in order to mitigate bruising and scale loss, such as using a salmon slide, will be beneficial in achieving higher grades equating to higher prices.

Our fleet has evolved into a high volume and high quality progressive fishery. I have no doubt we will continue to move up the grading curve. **The stakes are high; Bristol Bay ex-vessel value for 2010 was about \$190 million.**

I trust that each and every fishermen who sets a net, will take a moment and stop and think about how you can contribute toward efforts to keep our val-

able fishery and hold on to our economic stake, considering the challenges we face. **Our world-class fishery faces world-class adversaries.** We have amassed a great coalition of people and organizations to shoulder and lift the political load.

Please consider joining AIFMA, so that we can continue to do our part and lend our expertise to these efforts. Enjoy the articles within.

Good Luck and Good Fishing.

**David Harsila, F/V SK
AIFMA President**

AIFMA Annual Meeting

Date: Saturday, June 11

Time: 5:00 p.m. (Pizza)

5:30 p.m. (Meeting)

Bristol Bay School

Naknek

What's New at AIFMA

Subscription
\$25 per year

Thanks AIFMA!

Thanks for your leadership and steady emails and information flow. Keep up the good work. Your communication to us on events that can impact our fishery are always clear and timely. This information on the mine and Bristol Bay outer continental shelf is well covered. Thanks!

Mel Brown, F/V Mae Ana

KAKN Sponsorship

AIFMA will sponsor an ad on KAKN radio in Bristol Bay during tidal report:

"Tidal information brought to you by the Alaska Independent Fishermen's Marketing Association; join us in working to improve and protect opportunities for Bristol Bay fishermen."

Pacific Fishing Magazine

AIFMA will provide free subscriptions to *Pacific Fishing Magazine* starting this August to members.

New Flags and Hats

Watch your mail! AIFMA members will soon receive one hat and a flag. Hats are waxed canvas, water resistant and breathable. Additional hats are available for \$10 each for crew.

Join AIFMA's News List

AIFMA members receive timely and informative emails and price reports.

Bristol Bay Watch

The Naknek River went out April 9th this year, a week earlier than last year. All canneries are in full swing with activity at all camps. Crowley has had a small crew working on the vessels that they stored at the new Leader Creek facility since April.

The first fuel barge is expected in on May 11th. Prices are expected to increase between 50¢ and \$1.00. Work is progressing on the road to Pederson Point with completion to be the last week of May.

At the last Borough meeting a "Ribbon Cutting Ceremony" is being tentatively planned for the opening of the newly expanded Port of Bristol Bay on June 24, 2011. It is the hope that various Alaskan dignitaries will be in attendance, to show the importance of the port to the entire area. A sampling of local salmon is to follow giving everyone an opportunity to taste our fine products.

This year is also the 50th anniversary of the formation of the Bristol Bay Borough (Oct. 1962). There will be a special celebration of this during the Fishtival which is generally held the third weekend in July.

From the ADFG reports it looks like we can anticipate a pretty good catch again this season with all the river systems being

projected to produce a good return. In talking with Slim Morstad (Naknek/Kvichak area biologist) the plan is to fish the Naknek section early and hope we can eventually get into the Kvichak as the season progresses.

It will be up to the fish to come in an orderly fashion to allow us to harvest the maximum numbers while allowing the required escapement through the season! FAT CHANCE. Looking forward to see everyone again and good fishing.

Fred Pike, AIFMA V.P., F/V Spike

Sea to Summit Expedition

Following the 2011 Bristol Bay season, six adventurers including my deckhand and myself, will embark on a month-long trip to raise awareness and opposition to the proposed Pebble mine.

The expedition, known as the Sea to Summit, will mimic the migration of the salmon from King Salmon, 35 miles up the Naknek River and across Naknek Lake. We will then hike 17 miles into the Valley of Ten-Thousand Smokes and summit four peaks, which are the water source for the rivers.

Through our photographs and trip accounts, we hope to inspire others to protect the fragile watershed of Bristol Bay and oppose Pebble mine.

For more information and to follow our expedition: www.seatosummit.wordpress.com
Ross Trainer, F/V Nora H, AIFMA member

Bristol Bay Economic Data

Last year, the Obama administration recognized Bristol Bay's fisheries and wildlife values by withdrawing the Bay from the offshore oil leasing process until 2017. Unfortunately, a future administration could roll back this protection.

In order to keep fisheries in focus, World Wildlife Fund has commissioned Portland-based Ecotrust to define the cumulative value of Bristol Bay's five most important commercial fisheries. The study quantifies the ex-vessel, wholesale, processor, and retail values of salmon, pollock, king crab, Pacific cod, and halibut. "Our study uses data from 2005 to 2008 to follow the fish from the net to table. Our preliminary analysis has produced some eye-popping numbers" said WWF's Dave Aplin. The study is expected by June. For additional information visit www.fishbasket.org.

Bristol Bay Price Report

2010 Bristol Bay Ex-Vessel Salmon Prices				
Processor	Sockeye Base Price/lb.	RSW/lb. (sockeye)	Chums Price/lb.	Price Adjustments:
Leader Creek	\$1.25		50¢	Base price includes RSW/ice. Additional 10¢/lb. for bled sockeye; 1.5¢/lb. for fish slide; After July 16th additional 15¢/lb. for sockeye. Kings (60¢); Coho (35¢); Pinks (25¢);
Ocean Beauty	97¢	11.5¢	30¢	(Incomplete information) Production adjustment: OB combined adjustment with boat storage credits; for example: 9.188¢/lb. for 150-200,000 lbs. Additional 15¢/lb. for bleeding.
North Pacific Seafoods	96¢	10¢	10¢	Production Adjustment: 2¢/lb. (70-100,000 lbs.); 10¢ (100-150,000 lbs.); 12¢ (150-180,000 lbs.) 17¢ (180,000+lbs.)
Snopac	96¢	16¢	25¢	Production Adjustment: 2¢ (90-100,000 lbs.); 5¢ (100-175,000 lbs.); 8¢ (175-200,000 lbs.); 13¢ (200,000+ lbs.) Additional 5¢/lb. for bleeding; pinks at 40¢/lb. (94% of total catch was chilled.)
YAK	96¢	10¢	25¢	Production Adjustment: \$0.00 (less than 100,000); 10¢ (between 100,000 and 180,000); 15¢ (180,000 and higher). Top ten boats got a cash settlement. The top boat for the company got a \$25,000, and it went down from there.
Alaska General Seafoods	95¢	12¢	10¢	Production Adjustment: 3¢ (under 75,000 lbs.); 4¢ (75-100,000 lbs.); 9¢ (100-140,000, est.); 10-15¢+ (140,000+ lbs.)
Icicle	95¢	11¢	25¢	Production Adjustment: 2¢ (60-100,000 lbs.); 10¢ (100-180,000 lbs.); 12¢ (over 180,000 lbs.)
Peter Pan	95¢	10¢	10¢	Production Adjustment: 3¢ (50-75,000 lbs.); 7¢ (75-90,000); 9¢ (90-100,000); 12¢ (100-175,000 lbs.); 15¢ (175-200,000 lbs.); 19¢ (200,000+ lbs.)
Trident	95¢	12¢	25¢	Production Adjustment: 5¢/lb. (under 100,000 lbs.); 9¢/lb. (100,00-180,000 lb.); 13¢/lb. (180,000-200,000); 18¢/lb. (over 200,000 lbs.). Chum price after July 19th was 40¢/lb.

There are several new companies that are buying fish in Bristol Bay including Big Creek, Copper River Seafoods and Coffee Point Seafoods.

Prices provided to AIFMA by fishermen. Actual prices may vary.

2010 Drift Gillnet Earnings and Catch Report (CFEC preliminary numbers based on 91¢/lb.)			
Quartiles (Each quartile accounts for 25% of earnings/catch)	# of Vessels (1,494)	Est. Average Catch/Vessel	Est. Average Gross Earnings/ Vessel
1 (25% of earnings/catch)	183	201,546 lbs.	\$183,633
2 (25% of earnings/catch)	256	143,608 lbs.	\$130,856
3 (25% of earnings/catch)	349	105,269 lbs.	\$ 95,913
4 (25% of earnings/catch)	706	52,174 lbs.	\$ 47,537
Fleetwide Average		98,541 lbs.	\$ 89,784
Number of vessels fishing in 2010: 1,494 (CFEC). Dual permit boats: About 250 (per Morstad, ADF&G)			

Quartile Tables show the distribution of estimated gross earnings among permit holders. Quartiles are established by ranking permits (excluding educational, hatchery, test, and reservation), highest to lowest, by permit holders estimated gross earnings in the fishery. The highest quartile contains the highest ranked permits that account for approximately a fourth of the fishery total gross earnings aggregated to the nearest permit. The second highest quartile includes the next ranked permit holders that account for approximately a fourth of the fishery total gross earnings aggregated to the nearest permit. The remaining quartiles are defined in a similar way.

Canfisco Buys Leader Creek Fisheries

Canadian Fishing Company (Canfisco) purchased Leader Creek Fisheries, Alaska's leading producer of wild sockeye salmon fillets this past winter. John Lowrance, started the company in 1999 and pioneered the production of fillets using Bristol Bay sockeye salmon.

Canfisco also owns Alaska General Seafoods. Leader Creek Fisheries will continue to operate as an independent operation with a name change from Leader Creek Fisheries LLC to Leader Creek Fisheries Inc.

John Lowrance will remain with the company during the transition period. Norman Van Vactor has been with Leader Creek for the last three years as Operations Manager. He will be assuming the role of General Manager.

Bristol Bay Week in Washington, D.C.

During the week of March 28th, David and Janis Harsila, representing AIFMA, traveled to Washington, D.C. along with an excellent group of Bristol Bay residents and leaders, commercial and sport fishermen, and environmental group spokespersons to protect the world's largest and healthiest wild sockeye salmon fishery.

The group lobbied on two issues: gaining permanent protection from offshore oil and gas drilling in the Bering Sea and issues related to the proposed Pebble Mine. The group supported use of EPA's Section 404 (c) of the Clean Water Act. Other events and receptions celebrated the region's fishery. These events brought the national media spotlight on Bristol Bay.

The highest profile event of the week was a reception at the Supreme Court sponsored by former Supreme Court Justice, Sandra Day O'Connor. O'Connor is an avid fly fisher who has cast her line for salmon in Alaska. She hosted the event to celebrate Bristol Bay and its salmon bounty.

Lisa Jackson, EPA Administrator, spoke briefly at the event and emphasized that science will guide her agency's assessment of large-scale development impacts in the region.

Others attending included the head of Tiffany's Foundation, Stone Gossard, Pearl Jam guitarist/Wild Salmon Center board member and Rick Halford, former President, Alaska State Senate. Sponsors included AIFMA, the Wild Salmon Center, Trout Unlimited, Bristol Bay Regional Seafood Development Association, Nunamta Aulukestai, Natural Resources Defense Council, Earthworks and National Parks Conservation Association.

In-person meetings with Interior Secretary Ken Salazar and NOAA Undersecretary Monica Medina provided delegation members opportunities to thank Secretary Salazar and the Obama administration for cancellation of the scheduled 2011 offshore and gas leases in Bristol Bay and protection until 2017. Discussions of how to obtain permanent protection were held.

AIFMA met with all California, Oregon,

Washington, Alaska senate offices and several representative's offices. Dinners were enjoyed at D.C. restaurants featuring Bristol Bay sockeye (very tasty!). Twenty restaurants participated in "Wild Salmon Week" and featured Bristol Bay sockeye on their menus. Chefs said sales were very good.

More than 200 chefs and restaurant owners held a news conference and sent a letter to the Lisa Jackson of the EPA to urge her protect Bristol Bay and in support EPA's study of Bristol Bay's Watershed and study of broader issues of large-scale development in the region.

Sandra Day O'Connor, avid fly fisherman, celebrates the bounty of Bristol Bay at Supreme Court reception.

Anglo American Voices Strategy on Pebble

"I have also said that Anglo American does not want to go where communities oppose our presence. That remains my firm commitment. But to those who quote opinion polls at me, I do not accept that this is an assessment that can be made today. There is still no mine plan, no formal proposal from Pebble."

...But until stakeholders have all the information at their disposal to make their decisions, I simply cannot accept that it is right to make a judgment on the project. I reject calls from Pebble opponents for premature decisions to be taken based on fear mongering not facts, and I stand by my word."

Excerpts from Speech about Proposed Pebble Mine given by Cynthia Carroll, CEO, Anglo American, March 3, 2011 at a meeting of the Alaska Resource Development Council

Several members of Bristol Bay delegation met with Department of Interior Secretary Ken Salazar on issue of permanent protection for Bristol Bay from offshore oil and gas development. Secretary Salazar was presented with a photo by Robert Ketchum. The photo shows the Allen River that flows into Lake Chauekuktuli.

Left to right: Kim Elton (former Alaska legislator/Special Asst. DOI), Eleanor Huffines (PEW), Kelly Harrell (AMCC Exec. Dir.) Peter Andrew (BBNC board member), Joe Chiyhlook (BBNC Chairman), Ken Salazar, Sharon Clark (Nunamta Aulukestai), Gilla Sorensen, (Dillingham High School student), Tom Tilden (Nunamta/Curyung tribe), Verner Wilson (WWF), David Harsila (AIFMA President) and Gary Kline (Nunamta Permanent Protection Coordinator)

DNR's 2005 Bristol Bay Area Plan in Court

On April 19th the Alaska Supreme Court heard oral argument in the lawsuit, *Nondalton Tribal Council, et al. v. Alaska Department of Natural Resources*, in which six tribes, AIFMA, and Trout Unlimited sued the Department of Natural Resources (DNR) in 2009 to overturn its 2005 Bristol Bay Area Plan, which applies for 20 years to state lands including at Pebble.

The 2005 Plan engages in a number of questionable practices. Of greatest interest to commercial fishers, the plan uses primarily marine criteria, such as whether land is a walrus haulout, a seal haulout, a sea lion haulout, an eel grass bed, a kelp bed, a marine bird rookery, or a herring spawning area, to determine whether inland uplands hundreds of miles from the coast qualify for protection as habitat.

Of course, the criteria include salmon spawning areas, but the Plan applies that criterion only to navigable water, and excludes moose and caribou. Therefore, the area of Pebble, which had been classified as habitat by the prior 1984 Plan because it produces salmon in non-navigable water, is a caribou calving area, and is essential moose winter habitat, lost its habitat classification because it does not produce walrus, herring, kelp, etc.

That is absurd is and a measure of how much a commercial fisher should trust DNR. Next, the 2005 Plan has a public recreation land classification category for land used for sport hunting and sport fishing, but it has no land classification category for land used for subsistence hunting and fishing. It then defines recreation to expressly exclude sport hunting and fishing, which begs this question: If they are not recreation, then what are they?

All this shows that when it comes to Pebble, DNR cannot be trusted. To oppose Pebble, we have to oppose DNR. That is why AIFMA is suing to overturn the Plan, and has supported

EPA's use of Section 404(c) of the Clean Water Act, and state legislative designation of the Jay Hammond refuge.

In June 2009, the State moved to dismiss the lawsuit. The State asserted that, under Appellate Rule 602, the lawsuit had to have been brought within 30 days of when the Plan was signed in 2005, and that it is thereafter essentially immune to judicial review for the remaining 19 years and 11 months of its life.

In October 2009, the Superior Court in Dillingham held for the plaintiffs that (1) the 30-day rule does not apply, and (2) the Plan is a regulation and therefore

"The 2005 Plan engages in a number of questionable practices."

subject to challenge at any time. In December 2009, the State petitioned the Supreme Court to review those two holdings even though the case has yet to proceed to trial.

In April 2010, the Supreme Court accepted the issues for review. Counsel for the parties briefed the issues throughout the rest of 2010, and the Supreme Court heard oral argument on April 19th.

At oral argument, the Supreme Court justices were well prepared. They questioned both sides intensely.

At issue is not only judicial review of the Plan, which affects Pebble and much more, but also the role of the courts in reviewing DNR's actions as a check and balance on our system of self-government. Pebble is large, and these issues, which involve the role of courts in our system of self-government, could hardly be larger. How the Court addresses them will tell us much about the Alaska's state government.

EPA's Section 404(c)

Section 404(c) of the Clean Water Act empowers the EPA to veto the disposal of dredged material or to put fill in waterways like the major rivers downstream from Pebble.

The agency has only rarely exercised that authority, invoking it about a dozen times since the Clean Water Act passed in 1972, including only once in the western United States.

**Elizabeth Bluemink,
Anchorage Daily News, 2/8/11**

"The EPA is right to do this study. We are certain it will find that the mine presents unacceptable risks and should not be allowed to proceed."

Bristol Bay RSDA Spending Your Money

This season you can have your **own fish** custom-processed (VP fillets, H&G, fresh or frozen... even fly **fresh** via FedEx)—and you won't have to leave the fishing grounds.

The BBRSDA has funded a pilot project to help pay operating costs on a Custom-Processor/Direct Marketing tender that will pick up fish on the fishing grounds and run them into the beach to be processed at a processor of your choice. The tender will be available on the “shoulders” of the run, probably operating out of Egegik June 13-16 and in Naknek July 18-22.

The project was brought to the BBRSDA by Tony Wood of Wild Alaska Salmon and Seafood; Tony currently processes his entire catch in his own micro-processing plant in Naknek.

To be clear, any processor can process your fish; Tony is simply in charge of the tender operations. There are a handful of other micro-processing plants in Naknek, of which we have not yet assembled a list (if you are a micro-processor in Bristol Bay (anywhere) please contact the AIFMA office with your information).

Keep in mind you are not selling the fish to this tender. You will retain ownership all through the processing and shipping, until you sell your own fish to your customer—or you can just do a really nice (and simple) home pack.

In order to use the tender service you have to be registered as a “direct marketer” with the State of Alaska. You will receive a book of fish tickets and a code plate, you will have to write a fish ticket for the fish you have custom-processed, and make a landing report to Fish and Game. The registration process is relatively simple, can be completed on line, and costs \$25. The state will want their tax money for the value of the fish you have custom-processed; you take care of that in the off-season through an annual tax report.

If you are interested in taking advantage of this invaluable service, contact Tony Wood at 618-303-2433, or by e-mail at: info@wildalaskasalmonandseafood.com

If you have a BBRSDA related question about this, please contact Matt Marinkovich at 360-378-4686 or thinkfish@rockisland.com.

AIFMA member and RSDA Board Member**

Area-Wide Genetics Project: Too Expensive—Little Advantage

Opinion by Matt Marinkovich

At the January 24-25 BBRSDA meeting the board approved the expenditure of \$140,000 to contract three boats to collect samples for the Area-Wide Genetic Sampling project. The project's goal is to collect samples from fish caught June 22-28, 2011 (dates approximate), from areas outside of the regular fishing districts. Last year the cost was \$120,000.

The broader goal is to attain three years worth of samples; another \$140,000 sample-collecting project must be funded for 2012. This total three-year estimated expenditure of \$400,000 is only for sample collection. To be useful these samples must be run through the genetics-testing lab, at an estimated price tag of \$125,000 per year, for a total estimated cost of \$375,000 just for the sample processing.

When I asked Paul Salomone (Egegik and Ugashik Area Management Biologist) and Slim Morstad (Naknek/Kvichack Area Management Biologist), they both said they see no effective in-season use of the data, even if there was a time-saving genetics lab in the watershed, because it takes a full 24-hours to process the samples once they are received in the lab. They also said that looking at the data from an overview perspective in attempt to analyze run patterns or fish behavior would take more than just three years' data to draw any firm conclusions about anything.

I voted no on funding this project because I cannot justify spending this much money on a project with such an uncertain result. At the meeting I stated my reasons quite clearly, yet I was the only one on the board who voted no; all six other board members voted yes and are in support of this project.

Instead of spending this money on these genetic projects, I feel the BBRSDA board could direct it's spending in areas they have not yet considered. The proposal of an in-depth retail market analysis proposed by AIFMA, which had a high price tag as well, was turned down. I see such knowledge as valuable information that could point the board in new directions of marketing, product branding, assistance in developing new product forms... and other ideas not hatched because they lay in areas not yet explored.

If you think these ideas are good, or have your own ideas on how the BBRSDA should be spending your 1%, an email to the board goes a long way. You can find the board's emails on my web site, BBRSDAinfo.com, or on the official BBRSDA.com website.

Help for Fishermen in Japan

The Alaska Fishing Industry Relief Mission (AFIRM) is responding to fishing communities impacted by the Japan Earthquake and Tsunamis.

One hundred percent of contribution go for assistance to fishing communities most severely impacted.

AFIRM was first formed to assist the Gulf fishing communities following Hurricanes Katrina and Rita. The group coordinated the donation of a Marine Travelift to refloat thousands of vessels grounded far inshore by the hurricanes, as well as providing for an ice-making facility.

To make a fully tax deductible contribution, send your contribution to **AFIRM – 211 Fourth St, # 110, Juneau AK 99801**. Donations may also be made by phone through UFA at (907) 586-2820.

New Coast Guard Regulations for 2013

Captains operating boats beyond the three-mile Territorial Sea Line would need to "pass a training program" every five years in seamanship, navigation, firefighting, emergency drills and survival under provisions of the new Coast Guard regulations signed into law in October. The law would also mandate that all boats under 50 feet built after 2010 meet federal construction standards.

The new regulations won't go into effect before 2013, according to Ken Lawrensen, USCG Fishing Vessel Safety Specialist for Alaska, and the fishing industry will have time to comment on how the regulations are implemented.

One change would actually simplify things in Bristol Bay. The traditional

Boundary Line is being replaced with the three-mile Territorial Sea Line. As with the Boundary Line, regulations are different if a boat is inside or outside the line. Since the present Boundary Line divides the Egegik fishing district near Goose Point, using the Territorial Sea Line would make the regulations for safety gear the same south and north of Goose Point.

As with the Boundary Line, however, once outside the regulations become stricter, and will apply to both documented and state-licensed vessels.

Gone also would be the option to carry a life float or buoyant apparatus; required would be a survival craft "that ensures no part of an individual is immersed in water." Skippers would be required to maintain a safety logbook

and complete dockside safety exams every two years.

Proposed changes are described in Chapter 45 of Title 46 of the United States Code, "Uninspected Commercial Fishing Industry Vessels."
